Art Unit: 2817

The following is an examiner's statement of reasons for allowance: Sutarja discloses in figs. 5-6 a stacked current mirror arrangement having a dc offset connected between the gates of the transistors. One transistor of each pair operates in its linear region as described in the abstract. However, being in a current mirror arrangement, the input transistor of Sutarja is driven by an input current rather than by an input voltage as specified in all independent claims of the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
